

How to Upload Block List

In this module we will see how to Upload Block List.

To upload the Block List, Click on **Routing Block List Import**

Below displayed window will appear.

Screenshot: *Block List Upload*

This section is used to Upload Block List Containing all the Fields.

If you have a file containing all the Fields you can upload it from here. Just click on Import File and select the File and select the Overwrite Method, then just click on Upload button.

The File upload will get started. You can view the Upload status in Import Log window.

Here is the Sample of the **Complete Field Upload Block List**.

Screenshot: *Complete Field Upload Block*

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F	G	H	I	J	K
1	ANI_prefix	DNIS_prefix	egress_client_name	egress_trunk_name	ingress_client_name	ingress_trunk_name	time_profile_name	ANI_min	ANI_max	DNIS_min	DNIS_max
2	11112222				Term_Doc_C	Term_Doc_C				32	32
3	11122222				Term_Doc_C	Term_Doc_C					
4	11222222				Term_Doc_C	Term_Doc_C					
5											
6											
7											

Second Method to Upload the Block List is **Upload just ANI/DNIS**

Screenshot: *Upload Just ANI/DNIS*

Block List

The screenshot shows the 'Block List' application interface. At the top, there are two tabs: 'List' and 'Import'. Below the tabs, there is a sidebar with two options: 'Complete Field Upload' and 'Upload just ANI/DNIS', with the latter highlighted in red. The main content area is titled 'Upload just ANI/DNIS' and contains an 'Import File:' section with a dashed box for file upload, labeled 'Drag & Drop to upload'. To the right of the file upload area, there are several configuration options: 'Number Type:' with a dropdown menu set to 'ANI'; 'Client Type:' with a dropdown menu set to 'Termination'; 'Type:' with a dropdown menu set to 'Select one'; and 'Method:' with radio buttons for 'Ignore' and 'Delete', where 'Delete' is selected. Below these options is a blue 'Upload' button and a link labeled 'Show Example'.

This section is used to Upload Block List containing Just **ANI/DNIS**, no need to add all the Fields in the File, instead of that you can Just choose from the window,

- **Number Type** Choose which Number you want to Upload i.e. **ANI** or **DNIS**
- **Client Type** Choose the Type of Client i.e. **Origination & Termination**
- **Type** Choose the Type of Blocking i.e. **Block By Trunk & Block By Trunk Group**

Below Fields may be changing because of the selection of the above two Fields, i.e. **Client Type & Block Type**

If it is **Origination & Trunk** then the fields will be To select **Client & Ingress Trunk**

If it is **Origination & Trunk Group** then the fields will be To select **Ingress Trunk Group**

If it is **Termination & Trunk** then the fields will be To select **Vendor & Egress Trunk**

If it is **Termination & Trunk Group** then the fields will be To select **Egress Trunk Group**

To Import the ANI/DNIS File, Click on Import File and select the Fields with the help of above displayed data. After selecting all the Fields, click on Upload button,

The File upload will get started. You can view the Upload status in Import Log window.

You can download the sample file by clicking on Show Example.

Here is the Sample of the **Upload Just ANI/DNIS**.

Screenshot: Upload Just ANI/DNIS

The image shows a screenshot of an Excel spreadsheet. The active cell is B2, as indicated by the formula bar at the top. The spreadsheet has columns labeled A through L and rows numbered 1 through 13. Column A contains a list of numbers: 98765432101, 98765432102, 98765432103, 98765432104, 98765432105, 98765432106, 98765432107, and 98765432108. The cell B2 is currently empty and has a green border, indicating it is selected.

	A	B	C	D	E	F	G	H	I	J	K	L
