

How to Enable Enforce CID Block in Trunks

In this module we will see how to Enable Enforce CID Block in Trunks,

Go to **Routing Trunks Egress/Ingress**

Below displayed window will appear.

Screenshot: Trunks

	Host Port	Egress ID	Egress Name	Carriers	Call Limit	CPS Limit	Usage Count	Rate Table	PDD Timeout	Updated at	Updated By	Act
<input type="checkbox"/>		56	iplink_egress	iplink_egress	Unlimited	Unlimited	6 / 11	avj_vendor	6000	2020-08-28 15:11:24	admin	
<input type="checkbox"/>		80	new_dnl_egress	new_dnl_egress	300	30	2 / 0	dnl_egress_rate	6000	2020-08-27 09:21:34	admin	

Click on Edit Icon on any of Trunk on which you want to Enable Enforce CID Block.

Trunk Edit window will appear.

Screenshot: Trunk Edit Window

Type	Host	Port	Tech Prefix	Action
IP Address	192 . 99 . 10 . 113	5080		

On the Trunk window, check on **Enforce CID Block** to Enable it.

After checking the icon, click on **SUBMIT** button to save it.

Follow same procedure for both Ingress & Egress Trunks.
