

How to Export (Ingress & Egress)Trunks?

In this module we will see how to Export (Ingress & Egress) Trunks,

Go to **Routing Trunks**

Below displayed window will appear.

Screenshot: *Trunks*

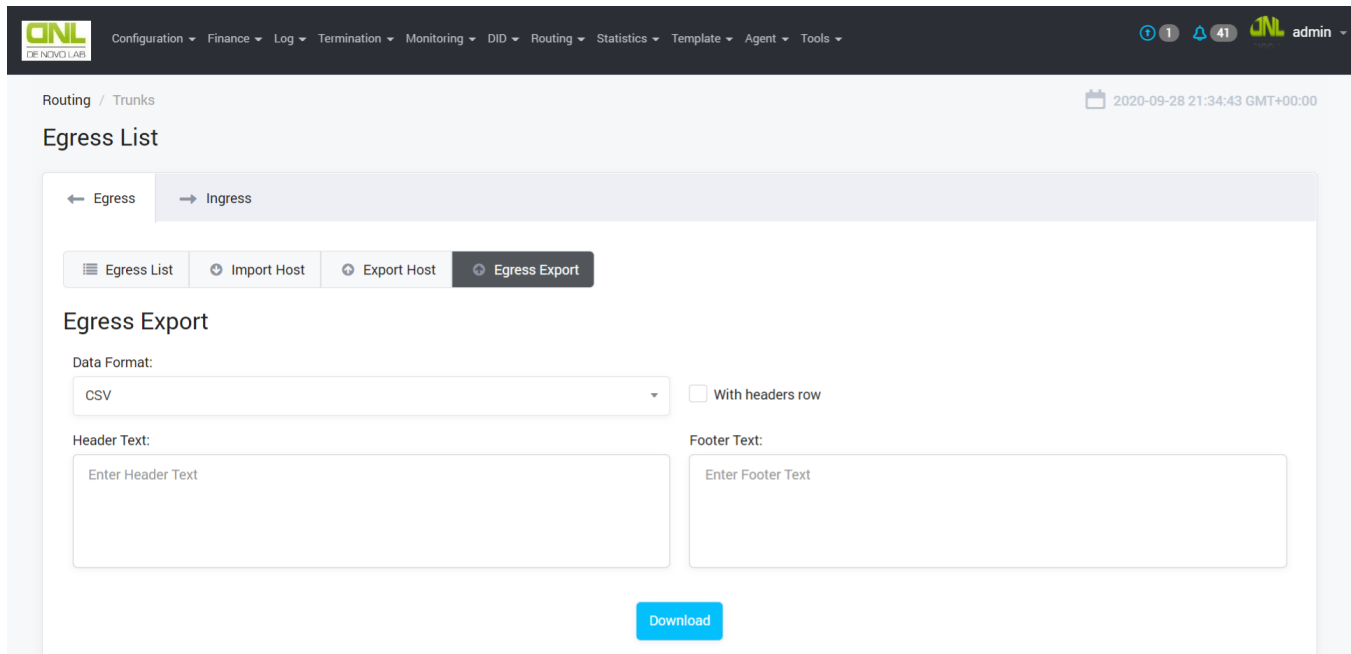

On the Trunks window, select the Trunks whose (Ingress & Egress) Trunks you want to download and if you want to download all no need to select.

Now got to Egress Export, Click on Egress Export

Below displayed window will appear.

Screenshot: *Egress Export*

On the **Egress Export** window, Select the Data Format of the File, and fill out other fields whether you need Headers Row on top or not and the Header - Footer Text

After filling all the criteria, just click on Download Icon, **Trunks** will get downloaded.

Follow the same procedure for both Egress & Ingress Trunks.
